

Ocean Protection Council Meeting

April 26, 2017
Sacramento, CA

Proposition 84

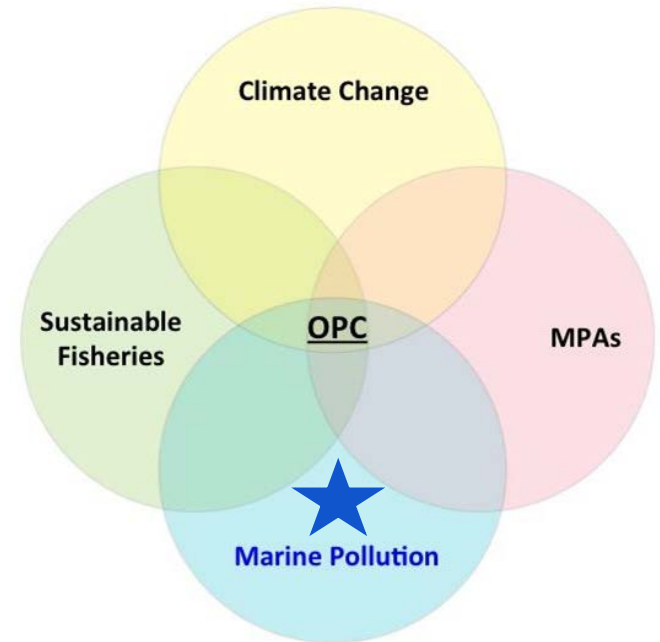

Funds may be used for a wide range of purposes:

- Scientific Research
- Adaptive Management
- Conservation of Marine Resources

Project background

- This project will address:
 - A high priority need identified by the State Water Resources Control Board.
 - An issue of importance to the Ocean Protection Council

5. Research, Development and Validation of Scientific Trash Monitoring Methods

Project Objectives

- Field test and validate methods to monitor for trash in receiving waters or habitats.

Project Cost

- \$800,000 (Southern California Coastal Water Research Project)

Outcomes

- A suite of methods to monitor state waters for trash in a variety of habitats.
- Engaged and educated stakeholders that understand how to effectively monitor receiving waters.
