Tessa M. Hill, Ph.D.
Professor, Dept. of Earth & Planetary Sciences
Bodega Marine Laboratory
Coastal & Marine Sciences Institute
University of California, Davis

Dear Tessa,

Thank you for the invitation to provide guidance as part of your OPC Proposition 84 proposal, "The Geography of Stress". I am very interested in the outcomes of your research and would be happy to serve on the Advisory Group of this research. I will also look forward to collaborating with you on how we can integrate results of your research into our Atlas of Marine Protection (MPAtlas.org) and further our understanding of these important issues as they relate to our marine conservation efforts.

Thank you,

Dr. Lance Morgan, President

and Bodega Marine Laboratory
Associate Director - Academic Programs
Coastal & Marine Sciences Institute
University of California, Davis

Dear Tessa,

Thank you for the invitation to provide guidance as part of your OPC Proposition 84 proposal, "The Geography of Stress". Your project will synthesize oceanographic and ecological datasets on the effects of OA and other stressors for key ecological species within California. I am very interested in the outcomes of your research and would be happy to serve on the Advisory Group for your research. I am also pleased to continue collaborating on the ACCESS data that will contribute valuable carbonate chemistry data for the north-central California region.

Thank you,

Jaime Jahncke, Ph.D.
Director,
California Current Group

TO: CA Ocean Protection Council Grants Manager

RE: Proposition 84 Grant Proposal “The Geography of Stress: Ecological & Social Thresholds of Vulnerability to Global Change in the California Current”, submitted by Tessa Hill,
UC Davis, Bodega Marine Lab

To Whom It May Concern:

I am providing this letter to confirm that I am willing and available to serve on the Advisory Committee for the project listed above. I would represent NOAA Fisheries West Coast Region in my role as Regional Aquaculture Coordinator for California, and would also represent NOAA’s Office of Aquaculture. I am honored to be able to participate in this important project. I work closely with my colleagues in the NOS-NCCOS Coastal Aquaculture Siting and Sustainability program, where marine spatial analyses are being used to inform appropriate siting of offshore and coastal aquaculture projects and also inform coastal managers and enable them to better manage marine resources while furthering sustainable aquaculture development. The proposal is intriguing and adds very relevant components for consideration when siting projects and managing our coastal and offshore marine resources. Serving on the Advisory Committee for this project is a role that is appropriate and timely for me in my work as a Regional Aquaculture Coordinator for NOAA Fisheries.

Please let me know if you have any questions. My contact information is below.

Sincerely,
Diane Windham

Dr. Hill,

Thanks very much for the invitation to provide guidance as part of your OPC Prop 84 proposal, "The Geography of Stress." I am highly interested in the outcomes of this research. I would gladly to serve on the Advisory Group and as a liaison to federal agency and aquaculture stakeholders.

Sincerely,
