**Recreational Red Abalone FMP Project Team  
Meeting (Webinar) #2: Update on Work Plan and Discussion of Data Streams  
and De Minimis Fishery Design Options**

**Thursday, July 18, 2019 | 9:00 am - 12:30 pm PST**

Webinar & screen sharing: <https://www.uberconference.com/strategiearth>

Optional call-in number: 424-228-8722, no pin needed

### Goals

- Update the Project Team on work completed since the first Project Team meeting on May 22, 2019 related to management strategy integration through computer-simulation models and the development of design options for a *de minimis* recreational Red Abalone fishery;
- Provide an overview of available data streams, and discuss the opportunities and challenges for data streams to inform management strategies; and
- Discuss and solicit feedback on the Administrative Team's effort to integrate ideas shared by the Project Team into strawman proposals for the design of a *de minimis* fishery.

### Agenda

#### Welcome & Goals

**9:00am - 9:10am**

*Introduce all in attendance and review the Project Team's goals for the webinar to create a shared understanding of approach, intentions, and desired outcomes.*

*Reference materials: Project Team Charter*

#### Project Team Updates Since May 22

**9:10am - 10:00am**

*Receive updates on progress made since the May 22, 2019 Project Team meeting, including establishing definitions for key terms, learn about priorities and needs for modelers, etc.*

*Reference materials: Project Team Work Plan, Glossary of Key Terms, Next steps for modelers from May 22, 2019 Project Team meeting*

#### Review Data Streams for Future Prioritization

**10:00am - 11:00am**

*Learn about data streams available to inform management of red abalone and discuss the trade-offs associated with each in the context of developing long-term, adaptive management strategies. Understand how the Project Team can continue working to increase understanding of data streams and inform prioritization efforts at future meetings.*

*Reference materials: Data Stream Comparison Table*

#### Continue Brainstorm on *De Minimis* Fishery Design Options

**11:00am - 12:15pm**

*Review and discuss strawman proposals developed by the Administrative Team, as informed by proposals submitted by the Project Team and break-out group discussions during the May 22, 2019 Project Team meeting. Provide feedback on the options for potential harvest levels and permit allocation approaches in a *de minimis* fishery through a restricted/managed access approach.*

*Reference materials: De minimis strawman proposals*

**Project Team Coordination, Next Steps & Adjourn**

**12:15pm - 12:30pm**

*Address any Project Team coordination and information needs and review next steps from the webinar, including Project Team “homework” to advance decisions on data streams/indicators and refinement of de minimis fishery design options.*

Please note that reference materials will be linked when available, and will be posted on the Ocean Protection Council’s project webpage ([here](#)). Please check back often for updates.
