

# Social and economic dimensions of managing entanglements

West Coast Entanglement Science Workshop

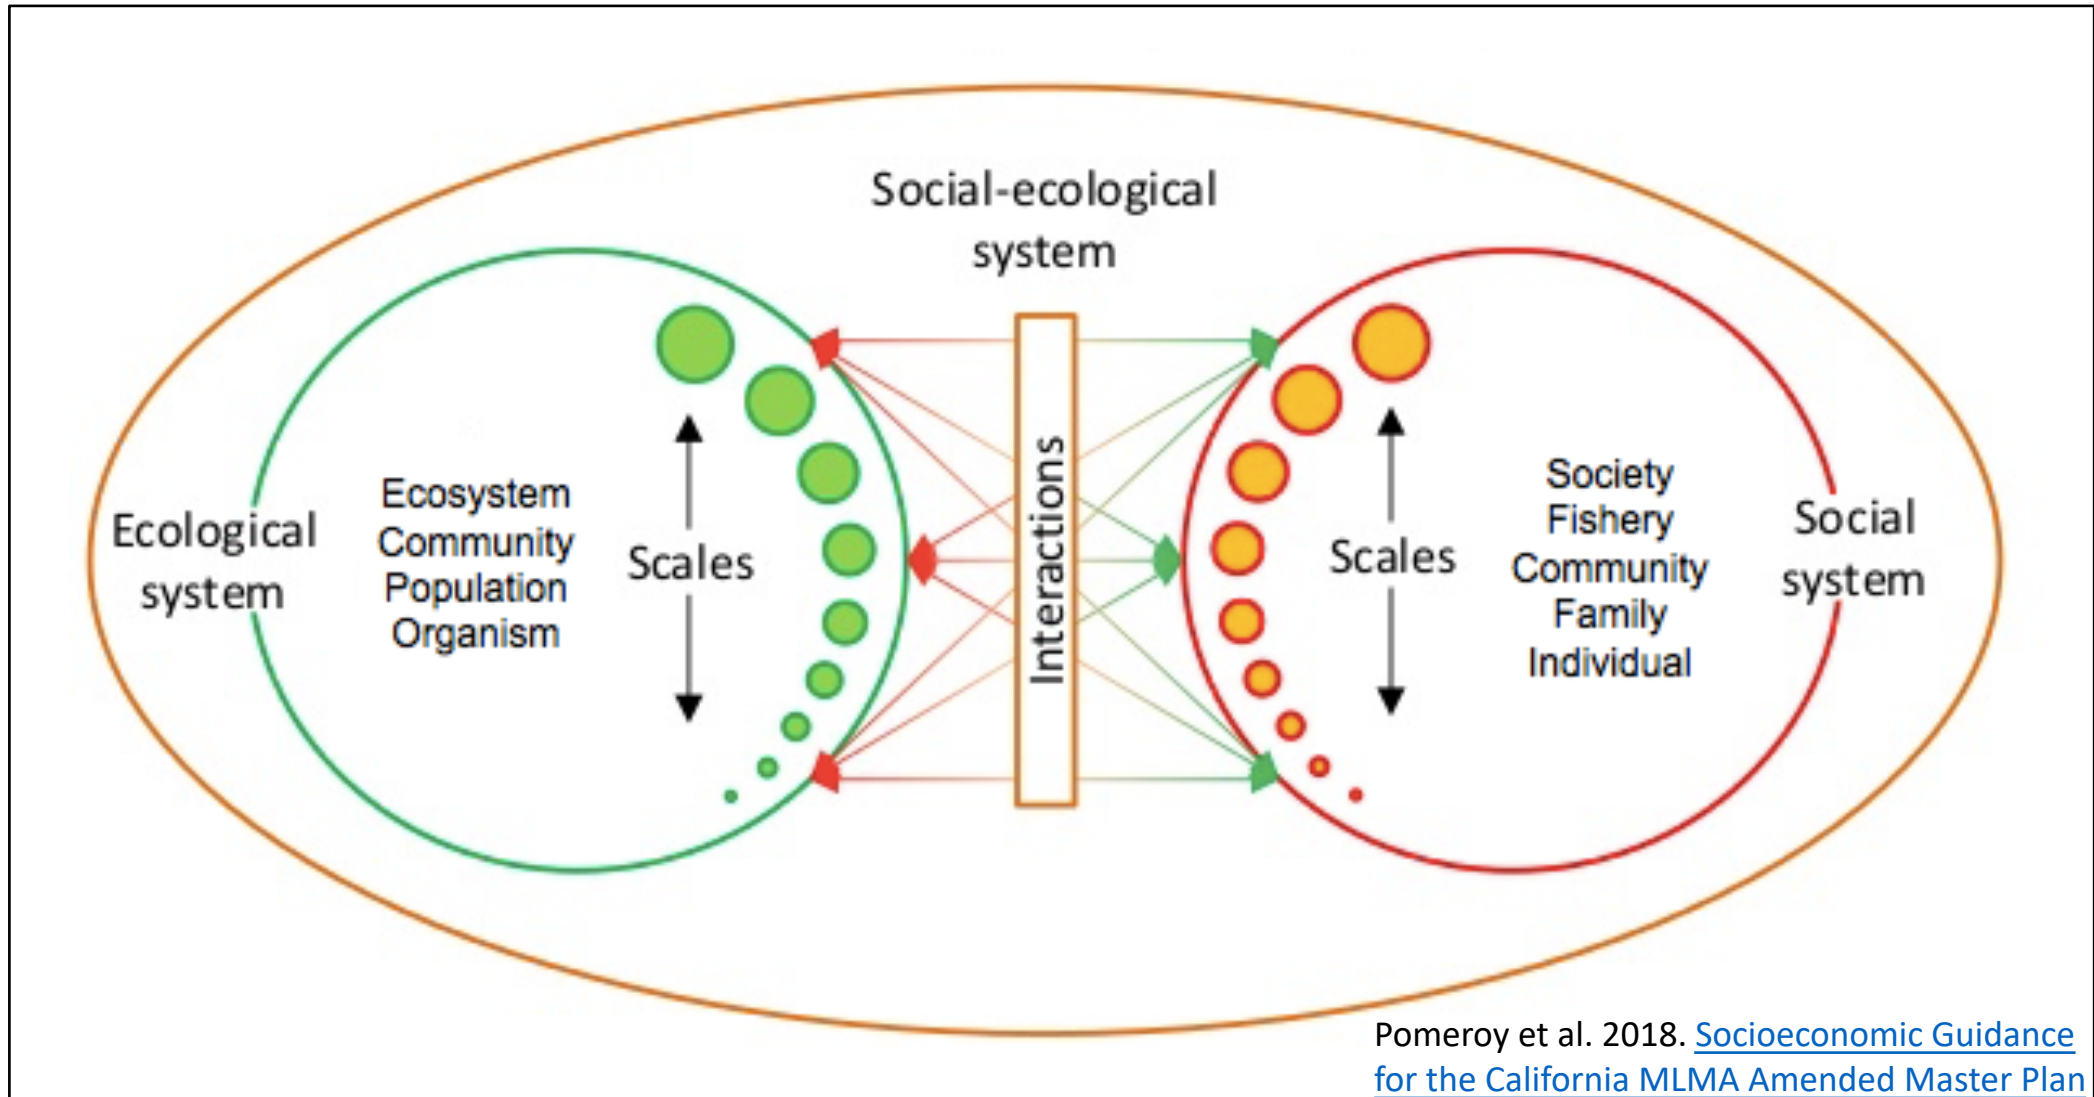

Module 3

September 1<sup>st</sup>, 2020

10:45 am – 12:00 pm

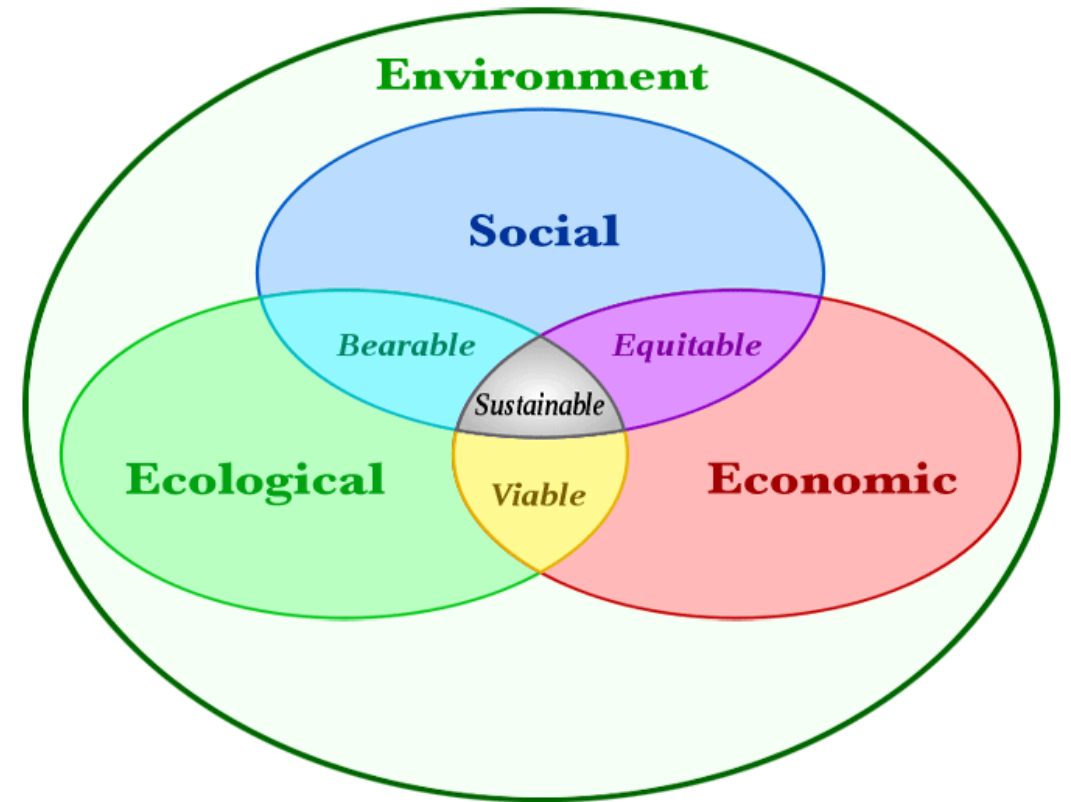

# Fisheries as social-ecological systems

Objective: Explore the ways that social and economic information can be utilized and improved to inform management decisions

- *What do we mean by the social and economic dimensions of managing entanglements?*
- *How are they relevant to management?*
- *What social and economic information is available – and what is needed – to inform management decisions?*
